if user has location services on, location will be detected and set automatically. If not user can select their country from here

Home country is automatically selected if user has location services switched on or has selected their country from upper right

Return is automatically selected, if one-way is chosen user would only have the → arrow between the two locations and would only be given results for one-way

Footer

pops up when user clicks in the destination field. User can select from one of the destinations listed and pick the specific airport from the list on the right, including an option for 'all airports' where applicable

user can also type in and results will suggest destinations based on what is being typed. (autofill)

Next flight

Continue without seat selection

Continue

to choose seats for return flight, user can either press the button 'Next flight' or click to switch the tab

will show seat number when clicking on a seat

first seat will be assigned to first passenger & second clicked to second passenger

values of odd (1st, 3rd, 5th) click will allocate a seat

to the first passenger & values of even (2nd, 4th, 6th) click allocate to the second)

if a fare is selected where seat is not included in the price, this button will show in case user prefers to be allocated a random free seat

seats colour coded & a key is provided to the right with what each colour means

user can select their seat by clicking

pop up comes up after clicking 'Next flight' / switching tab to choose return flight seats. If user clicks 'yes', the same seats will be chosen automatically

After popup
↗

After switching to return flight, button changes to say 'confirm seats!'.
To continue to next page, user must click on this button.
